#### 2007 TORCH CALENDAR

TORCH is published bi-monthly to help promote safety awareness in Air Education and Training Command, the Air Force and Department of Defense. This funded Air Force magazine is an authorized publication for members of the U.S. military services. Contents of TORCH are not necessarily the official view of, or endorsed by, the U.S. Government, the Department of Defense or the Department of the Air Force. The editorial content is edited, prepared and provided by the Directorate of Safety, Air Education and Training Command, Randolph Air Force Base, Texas, following public affairs publication guidelines outlined in DOD Instruction 5120.4 and Air Force Instruction 35-101. All photographs are Air Force photographs unless otherwise indicated.

HAPPY SOTH, AIR FORCE!

The state of the s

BY COL. JOHN W. BLUMENTRITT

On Sept. 18, 1947, President Harry Truman signed the National Security Act, making the U.S. Air Force an independent service. Since then more than 54,000 Airmen have made the ultimate sacrifice in battle. As we roll into calendar year 2007 and celebrate the 60th anniversary of our proud service, it's perhaps fitting that the Air Force made history this past year by recording its best flying safety record yet.

Ithough even one flight mishap is too much, Air Force flight safety set a milestone in fiscal 2006 with 19 major flight mishaps, the fewest ever for the service. According to preliminary calculations by the Air Force Safety Center, this equates to less than one Class A flight mishap (those costing more than \$1 million) for every 100,000 hours of flying.

As for what caused the 19 mishaps, nine were the result of operational human errors, such as aircrew mistakes, while seven were linked to aircraft problems. The remaining mishaps are still under investigation.

Air Education and Training Command did its part to help the Air Force reach this record year. The command had three major aircraft mishaps, for a rate of .54 Class A mishaps per 100,000 flying hours, which was even lower than the Air Force's record-setting pace of .85.

On the ground safety side of the house, the command experienced a tough year in most categories compared to the previous year. We had 11 fatalities, up two from fiscal 2005. We experienced 40 more on-duty mishaps, from 151 in fiscal 2005 to 191 in fiscal 2006. Sports and recreation mishaps and private motor vehicle mishaps also rose slightly. However, on the plus side, motorcycle mishaps decreased in the command by a hefty 20 percent this past year.

Also, it's significant to note that even though AETC ground mishaps rose slightly in most major categories, lost duty days caused by mishaps dropped

Col. John W. Blumentritt AETC Director of Safety

700 days, commandwide. ("Lost duty days" is the amount of days that members spend on quarters or in the hospital as a result of injury from a preventable mishap.)

by a substantial 16

percent, or nearly

Overall, the AETC ground safety mishap prevention program still had a solid year in 2006. With increased safety and personal responsibility emphasis at the unit level, especially by supervisors, the command is certainly capable of reversing adverse trends and championing a stellar 2007.

Of course, no matter what the trends, positive or negative, there's one thing that is always certain: We can always improve.

As outgoing Secretary of Defense Donald Rumsfeld recently wrote, "Too often we excuse mishaps by citing the difficult circumstances in which we operate. We have trained our men and women to operate safely in very trying conditions. There is no excuse for losing lives given proper planning, attention to detail and the active involvement of the chain of command. Accountability is essential to effective leadership. ... We simply will not accept status quo.

"If we need to change our training, improve our material acquisitions, or alter our business practices to save the precious lives of our men and women, we will do it. ... We can no longer consider safety as 'nice-to-have.'"

CG-4A HADRIAN. 1942-47

I echo those sentiments and promise that we will not accept the "status quo" in AETC. We will continue to proactively seek out innovative ways to get our mishap prevention messages to each and every member of our team. We have to become the consummate wingman – letting no Airman get overlooked or taken for granted.

We provide this Torch Calendar as a way to get you started off on the right foot safety-wise in 2007. It is chockfull of safety tidbits, as well as special safety observances throughout the year to help you plan your mishap prevention program. Also for your convenience, we provide Julian dates and highlight federal holidays and paydays, as well as include a pull-out poster with the entire year's calendar displayed.

And last but not least, this special edition calendar commemorates the Air Force's 60th anniversary with current and historical aircraft photos for you to display with each month of the year.

Help pay tribute to the service's 60th by having your best safety year yet. That would truly make it a happy birthday for our Air Force!

Jah W. Blumentrutt

#### 11

Number of fatalities in Air Education and Training Command during fiscal 2006. Eight occurred in the traffic environment, one in a privately owned aircraft, and one government vehicle off road. Of the traffic-related mishaps, three members died on motorcycles, and five suffered fatal injuries in automobiles.

Among the first steps in safely starting a fitness or weight-loss program is talking to your doctor beforehand. Physicians can advise you on good nutrition and the level of activity with which you can safely start an exercise program.

#### 80

Percentage of the Air Force's mishaps caused by human factors - or human failures.

### 8,800

Average number of people nationwide each year who are treated in emergency rooms for fireworks-related injuries to the fingers, hands, eyes and legs.

#### 6

Number of hours during the day when the sun's rays are most intense. You should limit your sun exposure during the hours when the sun's rays are the strongest from 10 a.m. to 4 p.m. Your shadow is an indicator of the sun's intensity. If your shadow is shorter than you are, the sun is at its highest intensity. Remember this simple rule: No shadow, seek shade.

#### 200,000

Average number of deaths nationwide each year that are related to alcohol use.

### THAT **FIGURES**

#### 19

Number of major aircraft mishaps (Class A, costing more than \$1 million) that the Air Force experienced in fiscal 2006 – that's the fewest ever for the service. At least nine of the mishaps resulted from human errors.

#### 30

Average number of minutes between deaths caused by alcohol-related crashes in the United States each year. Alcohol is a factor in nearly 40 percent of all fatal crashes.

#### 61

Number of private motor vehicle related mishaps in Air Education and Training Command during fiscal 2006. Common causal factors included inattentiveness, distractions, failure to obey regulatory guidance, alcohol and excessive speed.

TORCH MAGAZINE

TORCH.MAGAZINE@RANDOLPH.AF.MIL WWW.AETC.AF.MIL

The number of body parts most prone to injury in the field to include the back, neck, ankles and knees. Deployments can cause wear and tear to Airmen because they carry heavy armor, ammo and other equipment over rough terrain. You can help prevent these injuries by developing a conditioning program before you deploy to get fit and stay fit. Also, ensure you add a stretching program to your normal fitness routine.

#### 13

Percentage that motorcycle fatalities rose nationwide last year. Almost half of the people who died were not wearing a helmet.

#### 57

Average percentage of fatal crashes nationwide that involved only one vehicle.
